Material que acabara de chegar de barco à Ilha do Bananal para instalação de uma das torres da rede que liga Belém à Macapá através da Floresta Amazônica

Instalação de torre com 100m de altura na Ilha do Bananal.

Torre no município de Ponta de Pedras – PA.

Nas serras onde se procura causar o menor impacto possível ao meio ambiente, a ANID não permite o uso de tratores para abrir acesso a veículos. Assim, todo material, inclusive água, brita, areia e cimento para o concreto são transportados com ajuda de muares.

*Concretagem de uma base de torre de 54m na Serra do Céu – RN.*

A ajuda da comunidade é de vital importância na construção dos POPs ANID.

*Uma das 528 torres construídas pela ANID.*
